

THE DROUGHT.

SERIOUS WATER SHORTAGE.
EMPTY RESERVOIRS.
-England-

Picture.:-

This is a Reservoir - - that was ! The bridge should be over about fifteen feet of water.

But Yarrow is suffering from the drought. Crowds--
--come to see this unusual sight, and afterwards, thank goodness that the--

--local 'pub is not so dry as all this. Upper Rivington Reservoir shows how short Liverpool--

--is getting of the stuff that's used to wash with. This picture--

--might be a new by-pass road, but it isn't !

Cateleough Reservoir should be the principle water supply for Newcastle--

--and district. The tower is usually lapped by water, but now the Cheviot water-shed has not done its job,--

--and this bridge has been rediscovered. Nobody can remember having seen it before. The Upland--

--Fells are as dry as tinder, and winter--

--heath fires have been numerous. Whole flocks of sheep have been lost, burnt to death, but in this particular--

--blaze the shepherd, early on the scene, saved them for a rainy day.
