ROAR OF NIAGARA.

HUSHED BY ICY HAND.
FALLS FROZEN OVER.

-U.S.A.-

Picture:- Niagara Falls has practically shut up shop--

--for the winter, but it hasn't shut off steam. The American side is frozen--

--solid, except for a mere trickle, a--

--few feet wide. Here is a honeymoon couple trying to keep cool on the record Niagara freeze-up. Maybe for all--

--they know it's the middle of summer, and speaking of crazy ideas, let me introduce--

--the human icicle. It's 28 below zero, and he swears he likes it. No wonder Solomon--

--said all men are liars. He's had enough - - no, he hasn't - - the polar bear ! Unless he's got some special system of portable central heating, that clever swimmer is just trying to turn himself into a big stiff.
