

STORMY WEATHER.

FISHING DIFFICULTIES,
TRAWLERS CARRY ON.

-Scotland-

Picture. :-

Scotland takes a heavy beating. Gales have lashed the East Coast--

--with terrifying fury. At times the seas threw glistening tracery over one-hundred--

--feet high. A fine sight, but one which those who live on the seas's harvest--

--hardly appreciate. Anstruther Pier is under water most--

--of the time. But trawlers still make their risky way out to the fishing grounds. More risky than--

--usual just now. A sunken tug lies right in the--

--fairway. You can just see her rigging on the left.

Underwriters have warned vessel owners that they leave harbour at their own responsibility. A submerged wreck is a--

--menace to their safety. Heavy storm is fast breaking her up, but until the harbour mouth is cleared there is--

--considerable danger for those adventurous skippers who--

--take their craft to sea in bad weather.
