(1).

Picture:- The new multi-engined loak heed air--
 --liner Electra, ready for--
 --her first flight. Her twin motors develop 850 horse power.
 She is all metal,--
 --and carries ten passengers at 230-miles-per-hour.
 (EFFECTS).
 (EFFECTS).
 (EFFECTS).

230-miles-per-hour. Why, that's faster than Brighton.

(2).

Picture:- The world's smallest inhabited house. It was
 built by a working electrician at Stocksfield, Northumberland
 --for his small daughter. In it June--
 --Coats lives the life of a--
 --society hostess, invites her friends to tea, discusses
 the advent--
 --of a neighbour's new baby, and when she goes out the butcher's
 boy woos the Tweenie.

(3).

Picture:- Reverently impressive is Palm Sunday at Westminster.
 Outside--
 --the Cathedral thousands of the devout, with a sprinkling
 of the merely curious gather--
 --to see the service which symbolises--
 --Christ's triumphal entry into Jerusalem. The Bishop--
 --of Lanus, deputises for Cardinal Bourne in this--
 --ceremony of Blessing the Palms.

(4).

Picture:- Every day the world is becoming more air-minded,
 and Germany is advancing as--
 --quickly, if not more quickly, than the rest. School--
 --children are taught the principal of flight - to design
 and build model aeroplanes- gliders. Having done that they
 take steps(a lot of them)--
 --to discover how they fly, efficiently, or otherwise.

Several models crash quickly,--

--but teach a pupil why. But here is one which shows that the fledgling designer knew how to use his wings.
