DEATH FROM THE

A I R.

AMERICAN AIR FORCE PRACTICE.  
OVER LAND AND SEA.

-U.S.A.-

---

Picture:- A well aired subject just now is air--

--defence. Everybody is entitled to his own views. So here are some UNIVERSAL views. They were taken--

--in the Pacific. Fixing a torpedo before rising--

--off the deck of an aircraft carrier. (EFFECTS).  
(EFFECTS)

A torpedo is released with the charming idea of blowing up a battleship--

--and the matter of a thousand men. Another torpedo 'plane takes the air. (EFFECTS).  
(EFFECTS).

And the waters are split by another deadly fish which can bite through the toughest steel. On land--

--similar activities are in progress. Bomber squadrons fix--

--their cargo of frightfulness and take off for--

--practice. (EFFECTS).  
(EFFECTS - 8 SHOTS).

Old 'planes serve as ground targets--

--for this bomb dropping drill. (EFFECTS).

That set things alight ! Fine for practice, but one day it won't be practice.
