

(CONT).

- (4). Picture. :- In France dogs of war are disturbing--
--the population. Ex-soldiers, supported by thousands of--
--like mind hold an immense--
--demonstration against war. Banners proclaim--
--their will to peace, and raised fists--
--speak their determination. War is definitely out of
favour--
--and the longer it stays out, the better. Meanwhile
hard working fellows at--
- (5). --Wembley prepare for war, but only a small one. The
ground is being re-turfed--
--for the battle of soccer giants later on in the--
--season. If your lawn is losing its hair, this is the
way to replace--
--it and rescue it from the worm eaten old--
--age. By the time the spring arrives all the pieces--
--will have joined nicely together. And the Cup Final
combattants will find it in prime condition to roll on
and observe stars from a recumbent--
--position. Taking a great liberty I go from green

- (6) --grass to a Mardi Gras procession.
Sorry, and all that, but we're--
--here in Japan. It's--
--really a Mardi Gras, halloween--
--and thanksgiving, all rolled into one.
I say if necking is--
--popular in Japan, somebody has--
--got to work overtime. The figures are amazing. If
that--
--one was true, I wouldn't believe it !
