

WAR-BIRDS' TEST FLIGHT.

"UP" WITH A PATROL SQUADRON.

---

Picture:- If you would like to be in the fashion, and make--

--comparisons to try to--

--show how inadequate and almost useless our--

--own Air Force is, here's your chance.

These are pictures of--

--two American patrol squadrons making a speed--

--test from their base at San Diego. They are manned--

--by the pick of American service--

--pilots, and expect to set--

--up another record of some sort.

What, I--

--don't quite know. They certainly --

--are marvellous machines.

They may, or may not, be--

--better than ours. Who knows ? Anyway--

--it would be too grim a business--

--to think of finding the answer.
