LOCOMOTIVES FOR INDIA.

SHIP-LOADING FEAT.

---

Picture.:-

At Birkenhead the 'Belray of OSLO' takes a list--

--to port. The lop-sidedness is caused by the weight and strain of two-hundred--

--tons of locomotives being loaded for shipment to India.

The ship takes several of these--

--engines into her care, and the responsibility of the officer--

--acting stevedore is--

--no small one. A careless lashing and it would be--

--good-bye to engines and ship. But that's never happened yet, and we hope it never will !
