

ANOTHER AIR RECORD.

FRENCHMAN'S REMARKABLE FEAT.

Picture.:-

This map more or less explains itself. All these towns are within one hour's flight of Paris. 506 kilometres, about 315 miles.

Delmotte, the famous French speed ace--
--is arranging this amazing transport record.

A kiss from Madame Delmotte, and he's--
--off ! (EFFECTS).

Many flying friends on the military
aerodrome of Istres watch his progress as--

--he shoots across the sky in an attempt to
smash--

--the world's speed--

--record. The present record is--

--305 miles per hour set up by--

--James Wedell, an American--

--pilot. The official timing gear--

--shows that Delmotte has increased it by--

--10 miles per hour. This 315 miles per hour record
astonished even--

--Delmotte himself, although he's not very thrilled. Only
5 miles a minute ! Pouf !
