

W I N T E R S P O R T S.
ICE AND SNOW THRILLS IN SWITZERLAND.

Picture:- See Switzerland in comfort ! Why go and be frozen when you can get all the concentrated thrills for the price of a cinema seat. This is the Olympia Leap. A sudden--

--flight like a bird through the air, and he arrives in an upright position, rather to his own surprise. Talk about--

--exhilaration ! Here's another expert on skis - s - k - i - s ! Burning up the slippery slope. Coming--

--down ! Oh ! He's reached ground floor and bargain basement.

At this season of the year St.Moritz is--

--alive with sporting snow athletes of international fame. There's another losing his stripes !

The Olympia Leap ! It should be called the Olympia Limp ! Another off for the high jump--

--of which he gets the low down ! Having seen his fall from grace, let's--

--switch to the famous Cresta Run. Skis--

--are discarded for the skeleton, a sort of sled--

--which streaks down the steeper inclines like a--

--flash of lightning. I should think this--

--sport is rather good for keeping unwanted curves of the figure under control without artificial aids. The end--

--of the run is reached without mishap, and refreshment to keep out the cold receives deep consideration.

Well, having seen all this in the--

--comfort of your favourite cinema, with, I hope, your--

--favourite companion, it is time--

--to fish under your seat for your hat and what-nots and, Pass along, please !
