

FEATHERED WONDERS.

CAGE BIRD SHOW.

---

Picture.:-

Birds of all different feathers flock--

--together on this occasion. The annual cage-birds 'show--  
--at the Crystal Palace embraces--  
--every sort and size of bird - - of the winged variety.

Birds of paradise, birds who will never get there,--  
--the rare humming-birds, and others who have no humm.

This is where the judges appear--

--before the beak. An outsize in beaks which cannot--  
--fail to give its owner a pain in the neck. Another  
long beaked bird comes from India.

The song-bird is found 16,000 feet above sea level.

The cockatoo is found chiefly in bar-parlours.
