SMALLEST TORPEDO

BOAT.

FOR SIAMESE NAVY.

---

Picture.:- Tired of the world's biggest everything, we show you--

--the world's smallest torpedo boat, and take you for a--

--ride. Leaving Westminster Pier we see the Houses of Parliament still above water, despite--

--their load of passengers. Continuing our trip--

--we approach Tower Bridge. Then the boat starts--

--shifting at 50 miles per--

--hour, and we have got something else--

--to think about. This vessel is one of a fleet built for the Siamese Government. Each--

--carries two torpedo tubes, and--

--is capable of 55 miles per hour, not knots, neither, please note !

They are motor driven by a 12-cylinder engine, equipped with depth charges, Lewis guns,--

--and smoke screen, and the whole box of pretty--

--tricks weighs only 14 tons.

(EFFECTS - 4 SHOTS).

The fastest war craft afloat. Another advance towards purple perfection.
