

FOUR-FOLD RAIL CRASH.

TRAINS WRECKED AT KINGS LANGLEY.

---

Picture.:-

Records are usually events to applaud. But this unequalled goods train smash is--

--a melancholy affair. One life has been--

--heroically lost, several people injured, and the extensive damage has caused the loss of approximately one-hundred-thousand pounds. First a milk train--

--on the down-line ran into the rear of another.

The tremendous impact caused trucks to be--

--hurled across the up-line which brought--

--disaster to the Holyhead goods train.

A third set of rails was obstructed by wreckage--

--and into it ran a coal--

--train from Toton. Four trains in indescribable chaos. The driver--

--of the milk-train lost his--

--life while signalling, to save--

--other trains from disaster. He was too near the crash--

--and was found, nineteen hours afterwards buried beneath immense tons of--

--wreckage. His death is a shining--

--example of the integrity and loyalty of British labour.
