

NEWS IN BRIEF.

(4). Picture:- Post Office Research expert plays with fire.

Model telegraph--

--posts are positioned, and an electric--

--current of 25,000--

--volts is switched on. Lightning strikes the protected posts,
and no--

--harm is done. The conductor takes the--

--shock. Now model trees are subjected to the same--

--current, and split goes the wooden--

--trunks which have no wire conductors. Now you see why
spooring under--

--trees, especially in a storm is a dangerous pastime.

(5). Picture:- This dog does the shopping for his invalid--

--mistress. She couldn't afford to renew his licence. She was
summoned for payment.

Kind people heard about it, and sums amounting to £400--

--have been sent. Lucky dog!

(6). Picture:- A new sport! Water ski-ing! Fifty miles per hour
on two skis,--

--or one. It makes no difference. It's amazing. (EFFECTS)

He doesn't care how he risks his neck, providing it
doesn't break.

The kangaroo leap is just--

--coming. (EFFECTS).

(EFFECTS).

It's a marvellous thrill for those that like it,
but just give me carpet slippers, a hearthful rug, and the wet
effect in a tumbler.
