

JUBILEE POSTAGE STAMPS.

FILED FOR THE FIRST TIME.

Picture.:- Thousands of philatelists (what a word!), will be collecting the --

--tiny pieces of paper being turned out into thousands by--

--these machines. The festoon effect is caused by sheets of stamps--

--hanging out to dry, prior to being wound up. Oh, by the way,--

--this is a picture of the--

--processing of a special issue of Jubilee stamps. A small batch of $1\frac{1}{2}$ miles of them--

--going into the perforating machines, while the Post Master General--

--looks on, and thinks, probably of the profits. Please note--

--this occasion is unique. Never before have--

--the public, (meaning you)--

--been allowed to see the processes--

--of stamp printing. Thank the P.--

--M.G. nicely for the favour. One million of--

--this Jubilee issue is being printed, and they will--

--be offered for sale for only two months, so--

--if you are a philat -- er -- collector, shop early, and secure your--

--copy of the special photogravure portrait of His Majesty for $1\frac{1}{2}$ d.
