NEWS IN BRIEF.

(5). Picture :-

The advance of the French Suffragettes. Rather late, according to--

--our British ideas, but a woman--

--is usually late anyway. Note the chains symbolic of female serfdom in France. At the Place--

--de la Bastille, Madame Weiss, founder of the movement, plays with fire by burning the newspapers who don't--

--agree with her, while the Police look on--

--and tactfully say nothing. Still, the--

--ladies easily make up for that. They will soon get the vote. Frenchmen can never hold out very long against this sex appeal.
