ANOTHER WORLD AIR RECORD.

FAMOUS FRENCH FLYER'S ACHIEVEMENT.

Picture. :-

The umpteenth air speed record has been--

--set up. Competing 'planes start from Etampes Aerodrome,
and there goes--

--daring Raymond Delmotte, watched by--

--General Denain, France's Minister--

--of Air. Delmotte already holds the world land plane
speed record of 326--

--miles per hour.

And here he comes back. Why, it's only a snip
of the scissors since he flew away. Anyway in that--

--time he has collected another world's record, by
flying--

--278 miles per hour--

--for $4\frac{1}{2}$ hours. Pass along please. Who's next ?
