PROBING LUSITANIA TRAGEDY.

Picture.:-

The attempt to save the Lusitania recalls--
--one of the greatest sea--
--tragedies, and incidentally, one of the--
--Germans' greatest tactical errors. The 'Orphir' has been
specially equipped for deepest sea charting-----
--and diving. Two members of her crew were actually members
of the--
--torpedoed liner's crew when she sunk, with a loss of
1200--
--souls. A diving-suit constructed entirely of steel is
an important item of the 'Orphir's' gear. This suit will
withstand sea pressure to the immense depth of 1200-feet.
If this--
--attempt is successful, a secret of the--
--War may be revealed. Was the Lusitania a defenceless
passenger ship, or was she carrying munitions?--
--of war? A question just as well perhaps left
unanswered.
