

(CONT).

NEWS IN BRIEF.

(c). Picture:-

At the new Police College, Hendon, pupils are put through a course of instruction designed to enable them to deal with most of the emergencies which might arise in the course of their duties. After demonstrations by means of models, they are taught to skid gracefully without landing up against an unoffending lamp-post or pedestrian, and finishing up a day's

~~duty in the vicinity of a hospital !~~

A special track enables the pupils to gain experience passing obstacles on the road at speed. ~~and thirty~~

~~is not their limit !~~ Reversing, also, is an essential part of the training course.

A "good pull-up" ^{is} ~~for policemen~~ is very necessary, ^{too} particularly when a dog happens to wander into the road just when Robert is getting ready with his gong !

And if your brakes

are as good as there, you're OK.
