Picture.:- FRANCE : At St. Raphael,

the new under-water diving gear receives its baptism. It consists of

a lead belt, bicycle driven air

supply and breathing box. And down the gentleman

goes. Part of his equipment is a cine camera, for submarine photography. On this occasion the diver

spotted a water hare, a most extraordinary looking aquatic beast.

He brought his camera into action and obtained this record of a fish most strange for us to see when cold sober!

---

(D).

GERMANY : builds roads through marsh

land. Overcoming great difficulties!

Water logged land is cleared by

boring. Sinking electric

spark gear which fires huge containers filled with

high explosive. Several of these

sheels are sunk

into the land and

connected with the spark gear. The word is given and the

fire-works go off !
