NEWS FROM ABROAD.

Picture:-

While destructive plague cultures are multiplying, political patriots arrive for a conference at Geneva to endeavour to find some means of preserving the earth and its creative beauty. Having wittingly, almost cheerfully, sown the wind, reaping the whirlwind

has to be considered, lest all be uprooted. Baron Aloisi,

Mr. Eden, and many others, arrive with their various prescriptions. Some advise palliatives.

Others feel that only

a major operation may sweeten the earth. The doors of the Council Chamber are shut. The noise of manoeuvring armies cannot assist the concentration of problems of countryside peace. For 1935 years christian countries have said

"Blessed are the Peacemakers". Let's pray that the said reward is sufficient.
