

THE "MANCHESTER REGIMENT"
LOCOMOTIVE CHRISTENING CEREMONY.

Picture:-

And that's just where it is ! - - Manchester ! - -
In
typical topical weather, men of the Manchester Regiment
act as guard-of-honour to a railway engine. At present
the locomotive is known
as No.6148, but
Colonel Dorling of the Manchesters changes all that by
unveiling her name plate, revealing the proud
title of the 'Manchester Regiment'. The
engine is of the 'Royal
Scot' class. Her driver and firemen in charge are
ex-service men of the Regiment, whose name their charge
now bears.
