NEWS FROM ABROAD.

(A).

Picture.:- AMERICA ! Pictures of the crashed  
'plane which killed twelve people.

Parts of the machine were found scattered  
over a large area, indicating the  
severity of the disaster.

Prior to this, the dead pilot  
(nick-named "No Collision Collison)" had flown  
over a million miles without  
mishap. It is the  
United Air Line's first accident in 28-million miles.

FRANCE ! A new Seine dam is  
inaugurated at Avallon. It is to  
protect Paris  
from flooding. Millions of gallons are pumped from  
the river into reservoirs during  
the wet season, and back again when the Seine waters are  
low. This  
being an additional method of regularising the  
levels, and relieving pressure on the  
Paris reaches of the River.
