(C) Picture:- For the first time a troop-ship has been built to War Office requirements - specially for trooping purposes. She has now completed her trials and lies at Southampton waiting to ship her human cargo for Baska - to which port she will make her maiden voyage. Everything is provided for. Don't litter the ocean with litter ! For children going with their fathers and mothers, nurseries are provided. For the soldiers, there is a nice mess, and some of the wives know about it. In fact, a trip on this ship will be almost a luxury cruise. If only the Sergeant-Major will go easy, and the cure for mal-de-mer really does cure. Anyway, here's to her career in the Service.
