ATTACK!

MORE ACTUAL BATTLE SCENES FROM ABYSSINIA.

Picture.:-

Actual close-up scenes from fighting in Southern Abyssinia. Strong forts have been constructed in preparation for the next Italian advance. A barrage is dropped, with Italian observers watching results.

(EFFECTS)

The bombardment is successful. So run the reports. In fact recently endless battles have seemed to result in a great victory for both sides! However, the tanks advance, covering foot columns, and drive into the Abyssinian lines. We have got to believe that, because here it is! And furthermore, in a second or so, you will see the enemy surrendering to the Italian General. If you see it in 'UNIVERSAL TALKING NEWS', it is so!
