

ICE-SKATING IN YORKSHIRE  
CHAMPIONSHIP THRILLS.

108 P. 1531  
21 05 15

Picture: The Yorkshire Skating Championship. Shivering  
crowds see--

--the previous champion and would-be champs, race for the--  
--cup. The present holder is C. Carnes of Leeds and he  
gives the <sup>new</sup> holder favourite--  
--E. Richardson, of Selby, a fine fast contest.

EFFECTS.

EFFECTS.

But E. Richardson wins the mile in record time --  
--of three minutes 15 and two-third seconds and gets --  
--the 'cold' Cup. Well here's how, and now for a spot of--  
--heat. That's better! This is a fine frosty day--  
--for a hot demonstration of how to--  
--put out a fire. In this--  
--weather, lots of people worry about how to keep one--  
--going, but this is different.

The new invention is a flame suffocator.

A chemical foam is sprayed on the--  
--burning material, petrol in this case, the fire--  
--is put out and--  
--the chilled onlookers go to find another one.
