

GUN TO SAVE LIVES.

TESTED AT BRIDLINGTON.

---

Picture.:-

Late last year the trawler 'Skegness' was lost off Bridlington. The entire crew of 11 souls was drowned. The rocket lines could not reach the vessel, owing to the force of the gale being greater than the rocket power. This new rocket gun will prevent such another failure by rescue. (PAUSE). It is powerful enough to carry the line a great distance, even in the teeth of the storm. The small boat represents the vessel in distress. The rescue line reaches it, and a cable to carry the breeches buoy is attached and hauled ashore.

It is a gun to save lives - a nice sort of gun. By its aid the breeches buoy effects its rescue. This gun is the most up-to-date in the British Isles, and Bridlington has got it first! Bravo, Bridlington!
