

Birthday greetings to Prince Charles, Duke of Cornwall, on reaching the age of six. And here we take a glance back through the past year, to recall some of the gay occasions on which this important young man has appeared in public. This was the arrival in Malta --- after the Tobruk meeting with his mother and father, on their return from the Commonwealth Tour. It was his first trip abroad; and a memorable part of it was the visit to the famous apes on the Rock of Gibraltar.

Back in London --- Prince Charles savoured the kind of welcome the capital always extends, on a homecoming of the Royal Family. A carriage-drive through cheering crowds, followed by the appearance on the balcony of Buckingham Palace.

Another big event --- was the ceremony of Treeping the Colour.

His most recent appearance was when he said good-bye to his grandmother, the Queen Mother, as she left for her tour of the United States and Canada.

An occasion which showed <sup>beyond question</sup> ~~beyond question~~ that Prince Charles is a young man who does not intend to be kept hanging about by a mere ~~woman~~ girl.
