

This is the State Penitentiary in Boston, Massachusetts, where four convicts mutinied, holding five guards hostage while demanding release. Finally, the ~~mutineers~~ mutineers agreed to talk with a committee of citizens chosen by themselves; and --- after holding out for more than three days --- surrendered. <sup>16</sup> / ~~16~~

FRENCH FLOODS.

Among the places worst hit by the floods in Europe, are towns, villages and countryside in the district round Lyon, in France. On the roads by Tournus and Macon --- wheeled traffic has given precedence to anything that floats. The broad acres of French farmlands have disappeared; embankments are scarcely more than a shallower part of the river. <sup>13</sup> / ~~13~~

ST LAWRENCE POWER PROJECT.

From Canada --- the story of a river-flooding that is being devised by man instead of by Nature. On the St Lawrence River, work is going ahead on the building of ~~giant~~ giant powerhouses --- each of which will develop one million horsepower. Cost is being shared by Canada and America; the work will take about five years to complete.

BARCELONA ANIMAL SERVICE.

In Barcelona --- the celebration of the feast of St, Anthony, the Holy Abbot. The people brought animals of all kinds to receive a blessing. In order to maintain the solemnity of the occasion --- every precaution was taken to avoid a breach of the peace. <sup>13</sup> / ~~13~~

VIAREGGIO PREPARATIONS.

In Viareggio --- three months of preparation go into the making of the figures for the Carnival of Mardi Gras....., and making them is a traditional job handed down ~~from father to son~~ through many generations, from father to son. The wagging jaw, of course, is handed down from mother to daughter. Carnival is the time when all the citizens ~~of~~ celebrate; but it looks as if the figures have already celebrated. ~~13~~
